WORK EXPERIENCE

Apple | Cupertino, CA
Front End Engineering Intern | May - August 2017
- Contributed to internal frameworks and javascript libraries that support apple.com.
- Developed a dashboard that dynamically generates reports based on input using React.js, sails.js, d3.js, HTML5/CSS3, JavaScript (ES6), webpack, and mongoDB.
- Brainstormed a social campaign as part of a 3-day intern bootcamp, collaborating with other interns from different disciplines in the department.

New York Magazine | New York, NY
Web Development Intern | June 2016 - May 2017
- Developed components for custom Node-based CMS, ranging from site headers to Spotify and Apple Music embeds, using Handlebars.js, SCSS and JavaScript.
- Built interactive features and reusable interactive components, including a bar/line visualization tool and several quiz generators with built-in logic.
- Published a utils npm library to support the platform with 100% test coverage and documentation.
- Explored the Elastic stack with a logging module.

CodeHS
Coding Tutor | March - August 2016
- Graded, reviewed, and answered questions online from students and teachers who are going through the CodeHS curriculum, which uses the Karel programming language and basic JavaScript.

Flatiron School | New York, NY
Teaching Assistant | July - August 2015
- Helped teach students the basics of software engineering through labs and projects using Ruby and HTML/CSS.
